

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION II
NEW YORK, NEW YORK 10007

5380 Robert Street
Lewiston, 14092

Dear Resident:

I am an On-Scene Coordinator with the US Environmental Protection Agency (USEPA) and have been involved in the assessment work at Holy Trinity Cemetery property for the past year. Mike Basile (USEPA Public Affairs Official) attended the Town of Lewiston Environmental Board Meeting on June 20th. There were six members of the commission present as well as two guests and the town clerk. Mike provided the attendees with a copy of the Holy Trinity fact sheet and also provided some maps to illustrate the areas that we have fenced off. The chairperson, Jerry Wolfgang, asked that USEPA consider conducting residential surveying to the west of the fenced off area (Robert Avenue Residents across from the cemetery). There is no data or historical information that leads us to assess those areas. However, since the Town has requested, I informed them that USEPA would conduct gamma surveys in the yards and inside the homes if the individual resident desire.

I am contacting you to find out if you are interested in this survey. Since there are no indication that there are any environmental concerns on your property, we would need the property owner's feedback on this Town's request.

If interested, please contact me via email or phone with your specific information (owner name, parcel #, address, and phone/email). We would then need an access agreement to perform these surveys. A draft of an access agreement is included. These surveys are non-intrusive and will give real time readings of the gamma radiation emanating from the surface.

Regards,

Eric
